

Intellectual development

Intellectual development

- I can look at what's around me for a short while
- I can put my hand to my mouth and suck
- I look at things which stand out from the background (high contrast)
- I gaze at faces

Intellectual development

- I try to explore everything with my mouth
- I can try throwing, dropping, shaking and banging objects
- I look for something which has been dropped or partly hidden
- I'm very curious and am constantly exploring

Intellectual development

- I can look at my own hands
- I can bat objects which are over my head
- I can look at people as they move across my vision
- I can do two things at once (e.g. sucking and looking around)

Intellectual development

- I can experiment with things to find out what happens when
- I do something, (flicking a light switch) and I like to repeat things
- I can remember where things are hidden
- I can put a round shape into a shape sorter

Intellectual development

Intellectual development

- I like to explore things with my hands and fingers and eyes
- I bring things to my mouth to explore
- I can bat a dangling object over and over again
- I can look at a person for at least one minute

Intellectual development

- I can follow two step directions
- I enjoy make believe play
- I can match identical simple pictures of objects and bright colours
- I understand the meaning of two
- I can sort circles, triangles and squares

Intellectual development

- I use trial and error to solve problems
- I can place round, square and triangle shapes into a sorter
- I know three animal sounds
- I can find details in a favourite book

Notes
