

# Motor development

## Motor development

- I can lift my head briefly
- I can suck
- I can follow a person with my eyes

## Motor development

- I can sit without support and stand with help
- I can roll and pull myself along
- I can bang things together
- I can swap things between my hands

## Motor development

- I can stretch and squirm
- I can lift and turn my head
- My hands are more open than fists and I can bring them in front of me to my midline

## Motor development

- I can crawl
- I can pull myself up and walk along things
- I can walk holding hands
- I can pick up tiny things
- I can throw

# Motor development

## Motor development

- My head is steady when I sit with support
- I can turn to either side lying on my tummy
- I can reach and grab things
- I can hold a toy with both hands

## Motor development

- I can walk up steps holding on to something
- I can run, climb and walk backwards
- I can throw and kick a ball
- I can scribble

## Motor development

- I can walk up and down steps by myself
- I can jump with both feet together
- I can catch a ball
- I can thread things on a ribbon or string
