

Whānau say

We always talk and play with our pēpi, especially when we're changing kope or giving them a bath.

Pēpi likes to move around whenever they get the chance. And all that action can really tire them out.

We are always alert to possible dangers especially when they're on the move. It doesn't hurt to put a cushion behind them when they're sitting because they still lose their balance sometimes.

We notice the types of taonga tākaro that pēpi is interested in. Lids that open and shut, and things to bang, shake and make noises with are lots of fun.

Their little fingers love to explore, poking and pulling, and that waha still loves to taste test everything.

No need to buy lots of toys, exploring a pot and spoon or an empty container with a pop up lid gives pēpi lots of learning.
